Subject: Wireless Minimum Speed Survey

1: What are your views on prescribing benchmarks for minimum download speed as above? Please give your comments with justification.

Ans. Very good move by TRAI. It is consumer friendly. Minimum speed is very important. As per current scenario after FUP wireless internet is just useless. Hardly open web pages, it is very difficult to check mail with attachment after FUP.

2: Should the service provider be mandated to inform the minimum download speed to customers along with each tariff plan? Please give your comments with justification.

Ans. Yes. Because maximum speed may be upto 21mbps but the word "UP TO" is misleading because sometimes speed is as low as 1KBPS after FUP but it is fall under upto 21mbps or upto 64kbps speed category.
