Dear Sir,

I thank you for providing the opportunity. The issue is very important from consumer's point of view and therefore i had conducted a small survey among the selected crowd of small town where i am located (Jhunjhunu). I am not surprised that about 70 percent of the people are not in favour of floor price the reasons cited are as follows:-

1. It will not motivate some of these operators to upgrade the technology.
2. Data is basic necessity for digital india, the dream for our prime minister.
3. The floor price will be retrogressive step for free economy .
4. Success or failure of a business is to borne by the businessmen. Public should not be penalized for their wrong business decisions.
5. If regulatory intervention is accepted by the telecom companies, then their cost should be verified.

Therefore, Floor price demend should not be accepted. I expect TRAI should act in the interest of consumers and not in favour of telecom companies who have already made big money in last two decades .

Yours Faithfully,  
Dr Bhavna Sharma  
Professor (Economics)  
JJIT, Jhunjhunu
