Subject: Comments about fixing of floor price for telecom services  
To: advfea1@traf.gov.in

Dear Sir,

The consultation for the fixing floor price for telecom services is very important and views from the General Public should be invited. One Idea is to have a Snap Poll on Twitter/Facebook/Linkedin and ask opinion of the general public towards the same. However, in absence of the same I am giving my opinion as follows:

The fixing of the floor price for the telecom services is like fixing the price of a commodity. Telecom in todays day and age is no longer a luxury for a privileged few but actually a necessity for the masses to keep in touch and conduct business. For the PM's vision Digital India to succeed the telecom services are vital and the pricing is even more important. Allowing the fixing of floor price will take away the competitiveness and ensure that the telecom companies get enriched even if the cost to provide services falls drastically. In my opinion the floor price should not be fixed.

Thanks & Regards
