Dated : 13th of March 2020

Respected Sir,

We vehemently oppose the fixing of the floor price for the telecom industry as it will lead to the unjustified enrichment of the few telecom providers. What should be done is to fix the quality and the penetration of the services for a provider to get continuity in the business and leave the pricing to be determined on the demand. In case the provider is giving very good service and good penetration in poorly covered areas or even densely populated areas where the level of the service is poor at the moment they can command a better price.

Fixing of Floor Price will lead to a situation of unjustified profits for the Telecom Industry.
