

From: Vivek <kevivanand@gmail.com>

Sir, I just read the draft sent by Airtel which sounds ridiculous as none of their plan guarantees the speed as they claim within FUP itself..

Being an Airtel customer myself, I know their purposeful limitations when it comes to providing the speed like renaming their 3G services as 4G and downgrading the speed of actual 3G illegally.

I'm sure you will come to know That their concern over customer misusing their FUP is utterly false when your team independently analyses the data consumption vs the data limit.

TRAI has done a commendable job by banning Free basics similarly I plead TRAI to be vigilant over such crooked claims by Airtel to loot the customers more..

Thanks
Vivek
