TRAI Releases Network/POIs congestion report of the Cellular Mobile Service Providers (CMSPs) for the months of July, August & September 2008

The growth of mobile network is taking place at a very rapid pace and about 9 million subscribers are added every month. In order to ensure seamless interconnection, TRAI has been monitoring the level of congestion at the Point of Interconnection (POI) between various service providers on a monthly basis. This parameter signifies the ease with which a customer of one network is able to communicate with a customer of another network. This parameter also reflects as to how effective is the interconnection between two networks. The benchmark notified by TRAI in the QoS Regulation of July 2005 for this parameter is <0.5%. This means out of 200 calls between two operators only one call should face congestion problem. The result of the monitoring reveals that in a number of areas, the degree of congestion between the operators is alarming. In a number of cities, the level of congestion between the networks of different operators is far more than this benchmark.

Cellular Mobile Service Providers have submitted their POIs Congestion Reports in TRAI for the month of July, August and September 2008.

- We have included only the Service Providers who do not meet the TRAI stipulated POI Congestion benchmark of <0.5% in any of their service areas.
- The POI Congestion Report analysis for the month of July, 2008 to September, 2008 shows that the performance of the CMSPs with respect to the congestion on POIs has improved in the month of September, 2008 as compared with the performance in June, 2008. During the period Cellular Mobile Telephone Subscriber base has increased from 286.87 million in June 2008 to 315.31 million in September 2008. The number of POIs having congestion has decreased from 156 in June, 2008 to 129 in September, 2008.
- Out of these 129 POIs in September, 2008, in 67 POIs, the level of congestion is more than 5% as compared to 86 POIs in June, 2008.
- The number of such POIs where the level of congestion is more than 10% is 42 in September, 2008, whereas it was 54 in the month of June, 2008.
- The number of worst affected POIs where congestion level is more than 40% is 11 in the month of September, 2008 whereas it was 15 in the month of June, 2008.
- In respect of POIs from Private CMSPs to BSNL/MTNL, the number of POIs having congestion has decreased from 94 in June, 2008 to 68 in the month of September, 2008.

- During the same period POI congestion among Private CMSPs has also decreased from 62 in June, 2008 to 61 in September, 2008.
- Amongst the private service providers, Bharti Airtel has the largest number of POIs having Congestion (41 POIs as of September '08) followed by Vodafone 22 POIs as of September '08), Reliance Communications and Idea (19 POIs each as of September '08), Dishnet Wireless (18 POIs).
- The Circles/ States more affected due to POI congestion are Bihar, Maharashtra, Gujarat, Mumbai, UP-W and Himachal Pradesh.

The analysis of the degree of congestion in these POIs is given below:-

The POI congestion level between Private Service Providers and BSNL, and also among the Private Service Providers is given below in graphs: -

Number of POIs having congestion level between Private Service Providers and BSNL/MTNL

Number of POIs having congestion level among the Private Service Providers

Critical Analysis - Operator wise: -

The worst affected POIs where Congestion level on point of interconnections (POIs) is more than 40%, from Private Service Providers to BSNL and Private Service Providers to Private Service Providers for the month of September, 2008: -

POIs between Private Operators and BSNL										
Bharti Airtel	Tata Teleservices	Reliance Com/ Reliance Telecom	Idea Cellular	Vodafone	Dishnet Wireless					
UP-E:- Level -1 Indiranagar Axe Exch. = 58.00%	-	Reliance Telecom North East :- Cellone Shilong = 69.18%	UP-W:- Level -2 Kotdwar = 49.63% Almora = 48.25% Himachal Pradesh:- Cellone = 67.85% Level -1 Shimla =	Haryana:- Cellone = 52.96%	-					

	POIs among the Private Operators									
Bharti Airtel	Tata Teleservices	Reliance Com/ Reliance Telecom	Idea Cellular	Vodafone	Dishnet Wireless					
Rajasthan :-		Reliance Telecom	UP-W :-	Haryana :-						
Reliance	-	101000111	02	Reliance NLD	-					
Comm. = 77.88%		Bihar: -	Reliance = 63.42%	= 41.71%						
		Airtel Local = 58.50%								

The non-provisioning and insufficient provisioning of telecom circuit resource as per traffic requirements leads to:

- > inter-network congestion at the Point of Interconnection (POI)
- loss of calls
- repeated call attempts by consumers
- deterioration in Quality of Service (QoS)
- > consumer dissatisfaction.

The network congestion report of all CMSPs for the period July, August and September 2008 is placed at TRAI website – www.trai.gov.in
